

Sample interview structure

This is based on a dental procedure involving a general anaesthetic.

1. Free report: verbatim uninterrupted account of the proposed procedure.

- 2. Constituent elements: list these and make an entry each time one is mentioned so you can follow up gaps later.
 - a. Purpose why is this procedure necessary?
 - b. Ability to say no
 - c. Consequences or risk associated with saying no
 - d. Consequences or risks associated with saying yes
 - e. Nil by mouth pre op
 - f. Numbing cream to the hand

- g. Needle in the hand
- h. Mask on the face
- i. Anaesthetic
- j. Removal of tooth
- k. Wake up
- I. How long before going home
- m. Pain/discomfort
- n. Medication
- o. Follow up appointment
- p. Anything else

You can probe all of these even if they are not mentioned as long as you know the person has been told about them. Use the non-leading open question method you see on the website.
